

Abrasive Pots

RELIABILITY
PRODUCTS FOR EVERY PURPOSE

Increased waterjet efficiency
Reduced downtime
Customized to meet your needs

Ideally suited for

Optimizing your abrasive consumption
Increasing your garnet capacity

The AccuStream abrasive pots are a cost effective solution for increasing abrasive handling capacity or replacing outdated equipment. The right abrasive delivery system can increase efficiency. A second pot can be added to avoid long downtimes between changing from one abrasive size to another. Large 2000 to 4000# pots can be added to make handling bulk abrasive bags easier.

HIGHLIGHTS

- Low level Indicator light
- Pressure regulator with water removal for incoming air
- Single valve operation to pressurize and discharge pot
- Abrasive rated discharge valving
- Cover and Screen

REQUIREMENTS

- 80 PSI Air
- 115 VAC for level sensor

SIZES AVAILABLE

- 6 cubic foot (as shown above)
- larger sizes available upon request

SPECIFICATIONS

PHYSICAL	Capacity	6 cubic feet
	Garnet Capacity	800 lbs (362.9 kg)
	Operating Control	80 PSI Air
	Net Weight	500 lbs (226.8 kg)
	Length	38 in (965.2 mm)
	Width	31 in (787.4 mm)
